Travel Atlas

A personal travel logbook with customizable recaps

For people who enjoy life and want to keep the travel memories.

Meaningful travel records take too much time to create.

Your atlas, your recap

One account. Multiple trips. A travel history you can revisit and share.

My Atlas

3 trips 12 places

My Trips

- City journey
- Coastal week
- History trail

Dates, places, photos, notes

AI applications in Travel Atlas

AI

Multimodal API calls interpret photos and draft content throughout the workflow.

Group scenes

Group related moments using photo content.

Architecture

Street life

Photos + time + place

Choose highlights

Balance relevance and variety.

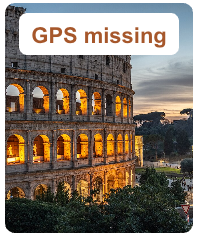

Suggested pick

Photos + recap scope

Suggest places

Use visual clues and nearby dated images.

Candidate

Rome

Confirm or edit

Photos with missing GPS

Write the recap

Draft a title and highlights from selected memories.

TITLE DRAFT

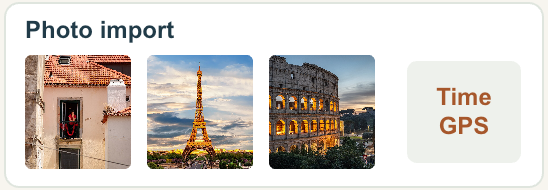

City days, remembered

Photos + trip + remarks

Delivery plan and success criteria

Four stages, each with a testable result.

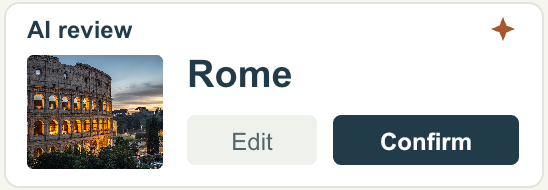

1 Record

Import, trips
and atlas

Reopen records.
Trip / time / place
filters stay correct.

2 Assist

Four editable
AI functions

Confirm inferred places.
Measure location error
and unresolved rate.

3 Recap

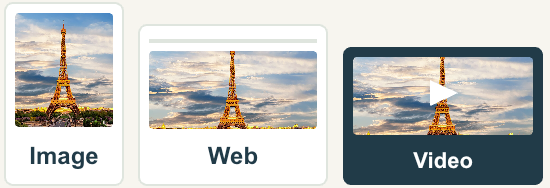

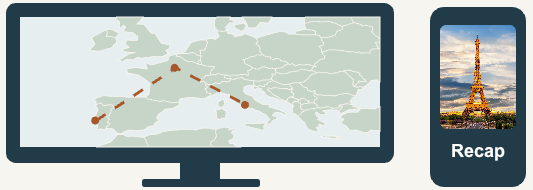

Image + web,
then short video

All three formats open.
Photos, text, stats
and style match.

4 Validate

Desktop + mobile
demo, code, README

Assisted total task time
is lower than manual.
Log cost and latency.

Test set: labeled photos, masked GPS and synthetic multi-trip cases
