Massachusetts Trip Planner / PROBLEM AND AUDIENCE

Planning by hand means four scattered steps. Our planner replaces them with a checked plan.

TODAY: PLANNING BY HAND

Check hours
on each place's website

Check prices
on another site

Read reviews
on a third site

Build the plan
in a notes app, by hand

WHO IT IS FOR

Visitors and students who want a usable plan in minutes, not hours of searching.

Visitor

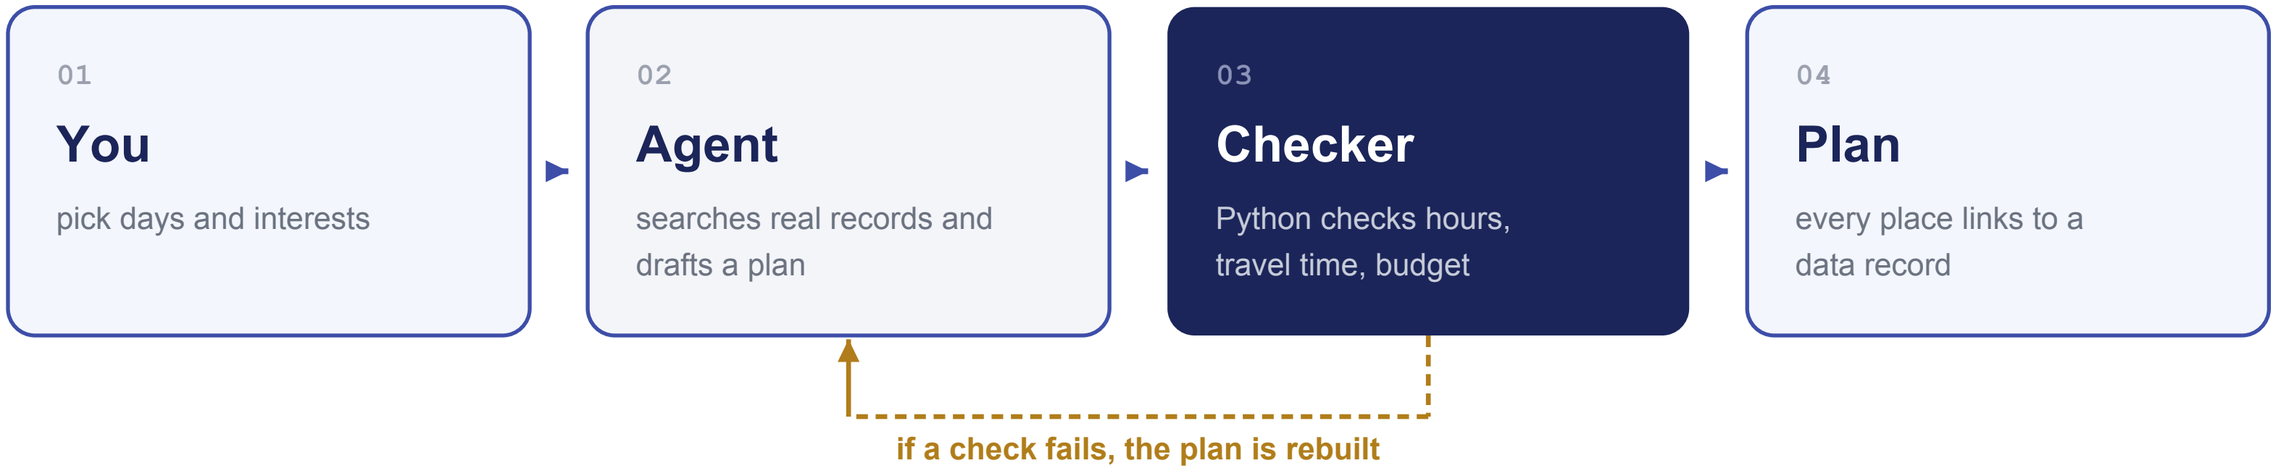

A weekend in Massachusetts, short on time, with a few interests.

Student

New to the area, planning a day out on a budget between classes.

Massachusetts Trip Planner / PROPOSED SOLUTION

You set the days and interests, get a plan, check the record behind each stop, and ask for a rebuild.

PLANNED EXTENSIONS

Taste ranking

Match places to the user, using review text.

Re-planning

Rebuild the rest of the day when a stop closes.

Massachusetts Trip Planner / APPROACH AND DATA

Every fact comes from a file. Gaps are labeled, not guessed.

87,588

businesses left after removing closed ones

10-core

reviews, used for taste matching

Sep 2021

snapshot date, so closures are possible

HOW COMPLETE IS THE DATA

Opening hours recorded

check each weekday

Price recorded

budget is an estimate

TOOLS

`Python` `pandas` `Claude API` `OpenStreetMap or straight-line`

Sources: Google Local, Massachusetts file (UCSD McAuley lab); removed 4,925 closed and 7 out-of-state. Cite: UCTopic (ACL 2022); Personalized Showcases (SIGIR 2023).

Massachusetts Trip Planner / SCOPE AND RISKS

I can finish version 1 by the midpoint. Other items are scoped out on purpose.

NOW · MIDPOINT

- One-day itinerary in Massachusetts
- Hours, travel, budget checks

LATER · FINAL

- Multi-day plans
- Taste ranking
- Re-planning

NOT PLANNED

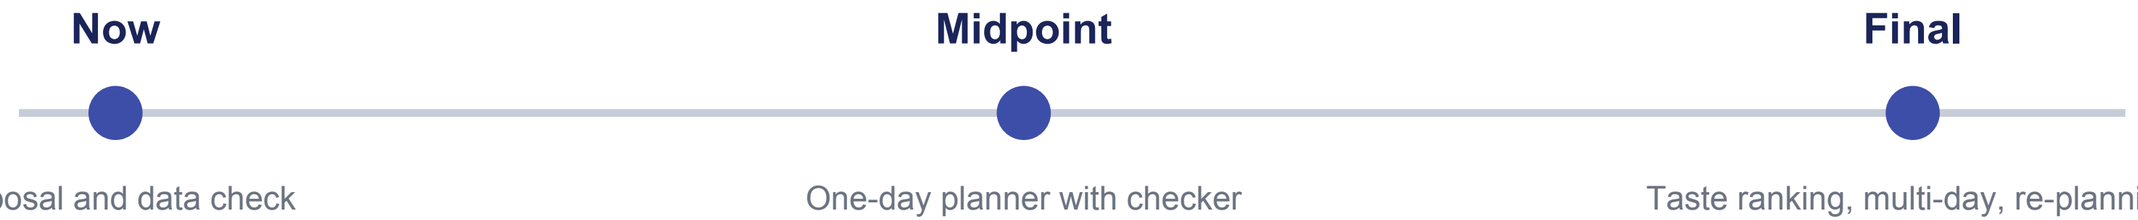

- Booking and payment
- Live availability

MAIN RISKS

- Data is from 2021
- Few museums outside Boston
- Budget is an estimate
- LLM may invent facts

Massachusetts Trip Planner / PLAN AND SUCCESS CRITERIA

Milestones are sized for a one-person project. Each has a visible outcome.

DEMO

Live run: a one-day plan from chosen interests, with checker output shown and each stop traceable.

HOW WE WILL TEST IT: 20 SAMPLE REQUESTS

0

Target: no time clashes
in the final plans (code checks)

0

Target: no made-up hours or prices
(checked against the data)

20

Test size: 20 requests, tried on
our planner and a plain chatbot
